

NOTE: Local Rankings are based on the data from the monthly local CARS reports. **Regional Rankings** are based on the monthly local reports data as well as some data from the regional reports.

This has no bearing on Alme Inami, which is completely separate. This is simply a ranking on the website to help encourage healthy competition in an effort to bring improvement in some key areas.

Scoring is **NOT based on the overall report**. Only specific **key areas** have been selected as criteria. This is so because those areas have been identified as extremely important and improvement in those areas is absolutely essential in order to ensure an active Majlis and a healthy basic structure at the local level.
